# Our history

TRANSWAGGON

TWA

It all began in the mid-1960s, when **Udo-Wolfgang Benthin** came up with the idea of coupling and marketing two 2-axle cars to form a 3-axle car unit in order to keep pace with the fast-moving industry.

At that time, ton tariffs were used instead of today's wagon loads, and with higher payloads (tons per wagon) and one wagon instead of two, the competitive advantage was immense.

So, on **9 February 1965**, TRANSWAGGON AG opened its doors in Zug (Switzerland) and TRANSWAGGON AB was established in Helsingborg (Sweden).

# Who we are

# Our services

Together we can find the answer

## Wagon rentals

Solutions for any need

## Train comissioning

From single wagons to whole block trains

## All-inclusive services

From rental to complete train handling

## Door-to-door services

Road to rail transport integration

## Throughout Europe

Shorter distances

# Covered wagons – around 11'800 wagons

TRANSWAGGON

## Bogie wagons, e.g. Habbiins 17

EUR pallets	63
IND pallets	42
Profile	G1
Loading length	22'000 mm
Wagon load	C = 56,0 t D = 64,0 t

## Short coupled wagons, e.g. Hiirrs 5

EUR pallets	72
IND pallets	60
Profile	G1
Loading length	2 x 12'540 mm
Wagon load	C = 54,7 t D = 62,7 t

# Flat wagons – around 1'700 wagons

TRANSWAGGON

Wood transport

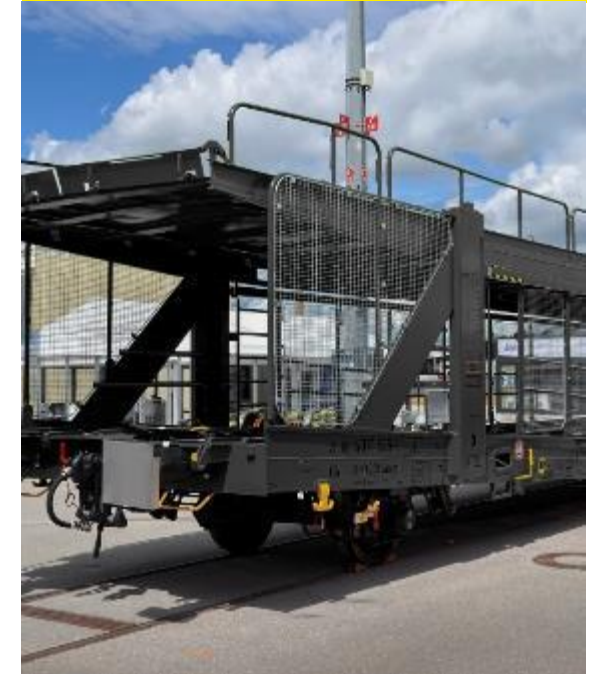

Commercial vehicles

Agricultural machinery

Double-deck car carriers

# Flat wagons – around 1'700 wagons

TRANSWAGGON

TWA

## Flat wagons, e.g. Laadks

Tare weight approx	24'500 kg
Number of scotch blocks	32
Loading length	25'760 mm
Wagon load	C = 47,5 t
Guardrail	No

## Modular wagons, e.g. Snps

Tare weight approx.	23.000 kg
Number of stanchions	24 units
Loading length	19'500 mm
Wagon load	C = 59,0 t D = 67,0 t

# Modular wagons – TiRex20

TRANSWAGGON

## TiRex20 on 60' container carrier (Sgns)

Tare weight	1'632 kg
Number of stanchions	8 per TiRex
Loading length	6'056 mm
Payload	22'000 kg

# Green logistics

TRANSWAGGON and Mercer Holz are continuing their successful business partnership, which has lasted for almost two decades

**Climate-friendly transport**

**One train replaces 90 lorries**

**We save 28,000 kg CO<sub>2</sub> emissions per train**

# Our contribution to e-mobility

TRANSWAGGON

TWA

How we improve sustainability in the automotive sector

In order to support the automotive industry with the current changes in logistics, we have expanded the application possibilities of the TRANSWAGGON Habbiins 15.

With it, we offer manufacturers of electric vehicles an environmentally friendly transport solution for battery components - and thus improve their carbon footprint.

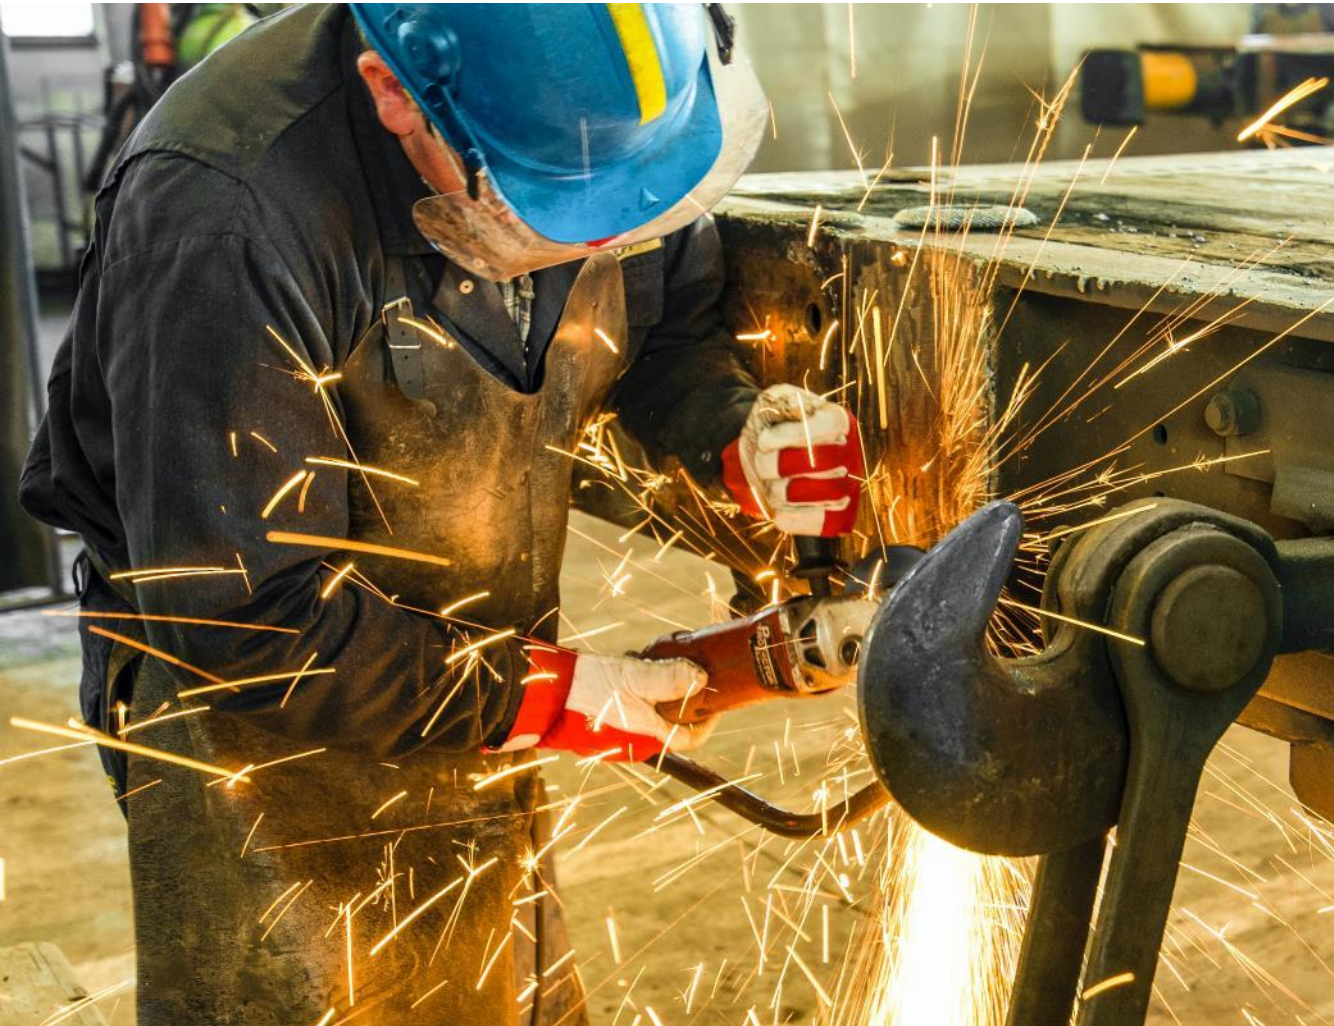

Individual transport

Efficient and climate-neutral

# Maintenance and modernisation

## Continuous inspection

The TRANSWAGGON wagon fleet undergoes continuous modernisation, maintenance and planned checks. We have in place a system of technical data collection for all the rolling stock.

Preventive and corrective maintenance is also managed and certified in compliance with European regulations for the Entity in Charge of Maintenance (ECM).
