DB Cargo FLS

Full Load Solutions for Europe and the Eurasian corridor

23.10.2025 | Saarbrücken

Full Load Solutions

Future of European Rail Freight can be promising – meeting customer needs/requirements and being sustainable/profitable is key

**Infrastructure: capacity
& reliability**

**Sustainability & climate
protection**

**Digitalization &
Automation**

**Intermodality &
connectivity/cooperation**

Road and Rail – backed by access to rail network without borders all over Europe and to/from China

Example
overview of some
connections

- Single wagon (and wagon groups) and block train
- Combination of road and rail
 - Multimodal
 - Intermodal
- Cooperation to improve customer offer
- Combining Networks to increase coverage
- Roundtrips necessary

We offer integrated intermodal and multimodal transport and logistics solutions – combining the strengths of road and rail.

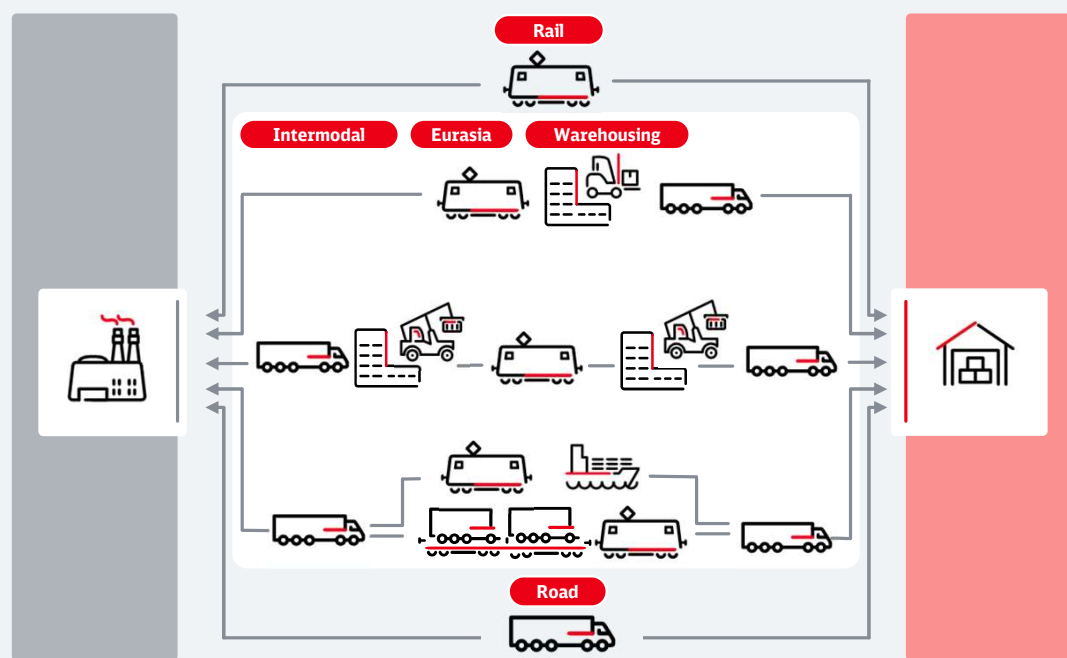

Efficiently combined from a single source:

Seamless integration of road and rail

- In addition to pure road and rail transportation, we offer flexible **intermodal and multimodal solutions** - even as far as **Asia** and for customers without their own siding
- By **combining road and rail**, we ensure optimal alignment with key factors such as **transit time, cost, quality, and CO₂ footprint**.
- Beyond transport services, we also provide **logistics solutions such as warehousing** to offer our customers comprehensive support for their logistics needs.

Our product portfolio

Road: DB Cargo Full Load Solutions – Your solution for efficient and flexible road transport.

We deliver the goods – also on the road Europe-wide full load expertise

- We find the right solution for you – whether for **regional, national, or pan-European full truckload shipments**

- We have a fleet of **several hundred vehicles** in fixed operation for you.

- We have the right equipment at hand for every requirement thanks to **around 11,000 tested and well-known carriers.**

Different types of equipment for individual transportation requirements

- | | |
|------------------------------|------------------------|
| ✓ Tarpaulin saddle/tautliner | ✓ Paperliner (Joloda) |
| ✓ Megatrailer | ✓ Telesaddle |
| ✓ Light semi-trailer | ✓ Semi low-loader |
| ✓ Open semi-trailer | ✓ Heavy-duty equipment |

*But we have more than just trailers and diesel vehicles. Our first **hydrogen-powered truck** will soon be put into operation.*

**>300 contracted full charter trucks
&
600 own trailers and chassis**

Rail: We offer flexible access to rail – Utilize the DB Cargo network and more, even to Asia.

Our European rail connections:

Flexible and powerful

- **Single wagonload and block train services** for customized transport solutions

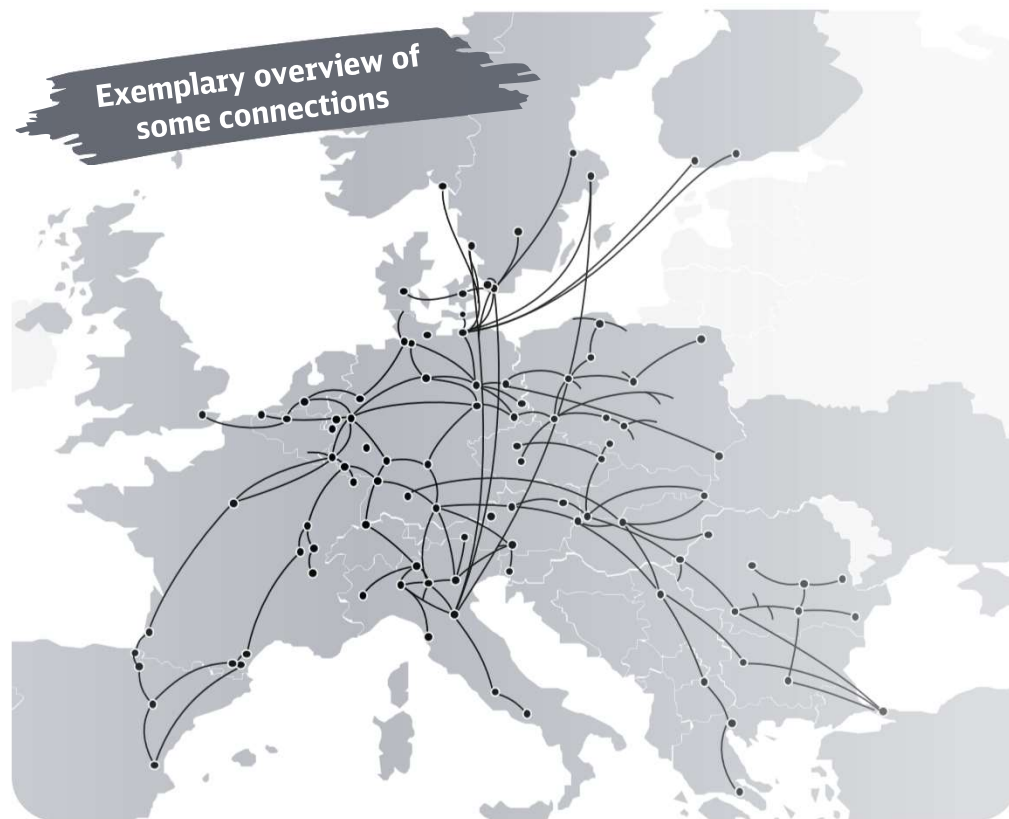

- **Flexibility** with high departure frequencies and connections

- **Maximum reach** thanks to DB Cargo's largest European network and beyond

- **Over 16,000 freight wagons**, luding numerous special wagons, offer high-performance transport capacities for a wide range of needs.

Intermodal: Operating in one of Europe's largest logistics networks – Fast and reliable full-load transport between European destinations.

Our intermodal network for full truck loads

Road | Rail

- Our **door-to-door solutions** elegantly combine road and rail transportation.

- Our **local experts** are happy to advise you on site with their comprehensive **know-how**.

- In the event of capacity bottlenecks and as part of **emergency concepts**, we can transfer to the road at any time.

- Our **equipment pool** consists of **600 trailers** (Mega and Standard, Code XL certified).

Intermodal & Road Trade Lanes

- ✓ High departure frequency
- ✓ Fast and reliable without traffic jams and rest periods or Sunday driving bans
- ✓ No toll charges
- ✓ Reduced CO₂ emissions

Eurasia: The efficient and reliable transport solution for fast connections between Europe and Asia.

Innovative logistics between Asia and Europe

Rail | SeaRail

- **Intermodal rail transport** as an efficient and environmentally friendly transportation solution with the option of integrating sea transport.
- **Short transit times** through fast and reliable transport of time-critical goods thanks to optimized transport routes and reliable schedules.
- **Comprehensive service** that includes customs clearance, door-to-door transportation and continuous shipment tracking.

Maximum flexibility

Your freight, your choice!

Single Container

Block Train

LCL

Optimized transit times for your freight

Door-to-door

Rail

19-24 days

SeaRail

29-31 days

Multimodal & Warehousing: Our logistics centers enable multimodal transport with eco-friendly rail solutions and warehouse logistics.

We offer a Europe-wide network with our own railports, multimodal logistics centers and numerous partners.

Multimodal logistics centers and railports

The gateway to rail

- **Multimodal connection** with flexible combination of rail, road and other modes of transport for efficient transport solutions
- **Europe-wide networking** with a strong network of railports and logistics centers for seamless transports
- **Numerous logistics services**, including storage, warehouse management, quality assurance, packing, repacking, order picking and the implementation of rail-based JIT and JIS concepts
